- Emission Inventory Questionnaire (EIQ) for Air Pollutants with supporting point source sheets for each emission source
- Variances
- Emission Reporting and Inventory Center (ERIC)
- Greenhouse Gas Reporting

air permitting and oil & gas production

New and existing oil & gas production facilities require Air Permits. An Air Permit MUST be obtained BEFORE construction can begin. Either a permit must be issued or an exception must be claimed. Act 918, enacted in 2003, provides for permit exemption for qualifying small sources.
