South Louisiana Community College CIVIL, SURVEYING AND MAPPING

Career opportunities for surveyors are rising, especially as land values increase and the need to use natural resources efficiently becomes more critical. The civil, survey and mapping program prepares students to work at the forefront of acquiring, analyzing, and managing land information. The program provides invaluable hands-on training for students with one-on-one instruction from faculty who have worked in the field and bring years of experience to the classroom.

POTENTIAL EMPLOYMENT

Petroleum Industry
Transportation Industry
Land Survey Companies
Construction Companies
Local Government

JOB OUTLOOK

Employment of surveying and mapping technicians is projected to grow about as fast as the average for all occupations. Recent advancements in mapping technology have led to new uses for maps and a need for more of the data used to build maps. As a result, surveying and mapping technicians are expected to have more work.
