

Legal Analyst

Map Solutions for the Legal Profession

Legal Analyst is the first Geographic Information System (GIS) created for the legal profession that combines mapping, annotation, collaboration and document control in a single intuitive interface that is optimized for speed, simplicity and security.

Managing a case load that involves geographic elements can be a challenge as most GIS companies do not move at the speed of the law process.

Legal Analyst facilitates fast, efficient and organized collaboration on cases using a very simple mapping interface. No training is needed to start working with Legal Analyst. Double the speed of your interaction with members of the case team. Produce exhibits for your cases instantly. Search case related documents using keyword tags. See annotations on maps from other team members.

With over 60 years of experience in Surveying, Mapping and Technology Fenstermaker represents a standard of excellence and quality that is reflected in Legal Analyst.

Fast, efficient internet map engine
Cloud based security (SSAE16 certification)
Professional mapping personnel
Data from all experts in one location
Attorney and expert collaboration
Case chronology easily displayed
Document control with annotation
Controlled user access and privileges
